

**Key & interpreting the data**

Allergy data detailed in the table has been derived from specifications obtained from the suppliers of the products.

NB the staff need to be informed of your allergy every time you dine with us even if you have eaten the dish before so that every precaution can be taken in our kitchen to prevent cross contamination.

**'N' means that the allergen is not part of the product as it is delivered by the supplier. However, we cannot guarantee that the product is '100% free from' that component because of the risk of unexpected cross-contamination.**

**'Yes' in a column entitled 'allergen(s) (e.g. gluten) present' indicates that the product contains that allergen & is, therefore, not suitable for you if you suffer from this allergy.**

**'C' means that this allergen is present in the manufacturing site/factory/supply chain & our suppliers believe there is a risk that this allergen could cross-contaminate the food.**

The 'Yes'/'No' in the column entitled 'suitable for vegans'/'suitable for vegetarians' details information supplied by the product manufacturer.

'Data unavailable' is where ingredient detail for the item/dish is currently unavailable from the supplier & will be added onto the table upon obtaining it. Or because it is bought at local level in-store.

Additives are artificial antioxidants, colours, flavourings, preservatives, sweeteners, flavour-enhancers & sulphites.

The Treenut column indicates the presence of the following; almonds, brazils, cashews, hazelnuts, macadamias, pecans, pistachios, walnuts & their respective derivatives.

**NB: We have taken all reasonable steps to ensure that this table booklet is accurate at the time of printing. However due to supply issues we may substitute products occasionally. Please ask your server for details. Your statutory rights are not affected. The Intranet and Pizzahut website will be updated regularly should any changes occur.**
